UNITAID is supporting global efforts to CUT MALARIA DEATHS BY 90 PERCENT BY 2030				
100%	\bigotimes			
THE THREATS TO PROGRESS	C Treatment is poorly targeted	Resistance to insecticides and malaria drugs is rising	Private health facilities are not handling malaria well, fuelling resistance	G Inadequate prevention endangers pregnant mothers and their babies in Africa
MALARIA IS IN RETREAT BUT GAINS ARE FRAGILE	Better treatment has helped halve malaria deaths in Africa	B Insecticides are protecting more people than ever before	Nearly 600,000 malaria deaths in 2013	Most malaria deaths are among children under 5
<section-header></section-header>	Co Make preventive drugs widely available to pregnant women	Speed up introduction of effective new insecticides to fight malaria	b Improve case handling in private facilities, where many go for treatment	Introduce emergency medication to save children with severe malaria

UNITAID: BRINGING THE BEST NEW TOOLS TO FIGHT MALARIA

The main contributors to Unitaid are: France, United Kingdom, Brazil, Norway, Chile, South Korea, Mauritius, Madagascar and Bill and Melinda Gates Foundation.
