

**Unitaid Executive Board Meeting
28th Session
19-20 December 2017
London I & II meeting room
Starling Hotel
Geneva**

Resolution n°5

Fever Management Area for Intervention

Recalling the analysis presented by the Secretariat during EB27 regarding opportunities for Unitaid to focus strategically on better tools for integrated management of childhood fever; and

With reference to the Executive Board's request that the Secretariat continues to work in this area with the aim of bringing Areas for Intervention for the Board's consideration, as set out in Executive Board Resolution UNITAID/EB27/2017/R1;

Having considered the further analysis presented by the Secretariat during EB28, the Executive Board supports the need for Unitaid to focus strategically on "Better tools for integrated management of childhood fever" with a view to improve case management of febrile illness and thereby contributing to the goals set out in Global Technical Strategy for Malaria 2016 – 2030 and the Global Strategy for Women's, Children's and Adolescents' Health.

The Executive Board requests the Secretariat to launch appropriate calls for proposals within this Area for Intervention and to present progress on implementation to the Policy and Strategy Committee.

The Executive Board's endorsement of this Area for Intervention has no budgetary implications.

**Celso Amorim
Chair of the Unitaid Executive Board**
