

# Innovating to end malaria

**Unitaid's malaria portfolio will more than double in 2018 and continue to expand through 2020**

## Our game-changing investments

### Preventive treatments

Protecting pregnant women in malaria-affected countries in sub-Saharan Africa, and children under five in Africa's Sahel region

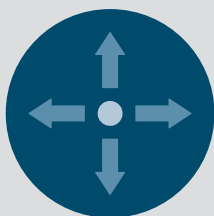

**\$ 137 m**

### Vector control tools

Protecting adults and children from malaria with new insecticides for indoor residual spraying and new long-lasting insecticide-treated mosquito nets

**\$ 136 m**

### Vaccine

Piloting a first-generation malaria vaccine in three high-malaria countries in Africa

**\$ 10 m**

### Diagnosis and treatment

Expanding access to rectal artesunate suppositories to treat children with severe malaria, and fever management

**\$ 120 m**

### Cross-cutting

Overcoming barriers to quality and supply of medicines for severe malaria and malaria prevention

**\$ 9 m**
