# UNITAID

INNOVATING FOR GLOBAL HEALTH

UNITAID seeks faster, cheaper and better ways to prevent, test and treat
HIV, Tuberculosis and Malaria

HOW WE OPERATE

UNITAID collaborates with global health partners and governments to:

Search for smart new ideas to help close the gaps

Accelerate full-scale deployment of practical solutions

Identify short-comings in the global response

Choose the best proposals and fund their development

WHAT WE ADDRESS

UNITAID fast tracks introduction of new health solutions by overcoming:

Intellectual property barriers

Lack of evidence

Inadequate delivery

Substandard quality

High prices

BREAKTHROUGHS IN FIGHTING DISEASE

UNITAID has actively contributed to:

-99%
Cutting the cost of antiretroviral medicines from $10,000 to $100 for a year's treatment

+100%
Introducing new TB testing tools, doubling detection rates for drug-resistant TB

-50%
Expanding access to new malaria drugs and diagnostics, contributing to **50% reduction** in deaths since 2000
