

**Annex to UNITAID EB17 Resolution 16 (WHO PQ Diagnostics)**

**Clarifications/ Issues to be addressed:**

Notwithstanding other information and clarifications that may be sought as part of the grant agreement and project plan development process, the Secretariat and/or the PRC specifically requires:

1. The section on capacity building at national level should be strengthened with detail of training activities and how to measure outcomes in terms of capacity. As this is an essential component of WHO PQ, this part of the proposal merits further development and emphasis.
2. Provide a clear approach to monitoring and evaluation that allows clearer quantification of outputs and outcomes of the project.
