## **Resolution n° 5**

### **Malaria and Areas for Intervention: Optimizing introduction of tools for the treatment of severe malaria**

Having considered the analysis presented by the Secretariat during EB23, the Executive Board supports the need for UNITAID to focus strategically on "optimizing introduction of tools for the treatment of severe malaria" with a view to securing a substantial impact on the Global Goals for access to severe malaria treatments in a timely manner.

The Executive Board requests the Secretariat to explore the expansion of existing investments within this Area for Intervention and to present progress on implementation to the Policy and Strategy Committee.

The Board's endorsement of this Area for Intervention has no budgetary implications.

A handwritten signature in blue ink that reads "Marta Maurás Pérez".
