**Resolution n° 4**

**Area for Intervention: Improvement of adult antiretroviral therapy in low and middle-income countries**

Having considered the analysis presented by the Secretariat during EB22, the Executive Board supports the need for UNITAID to focus strategically on the "improvement of adult antiretroviral therapy in low and middle-income countries", with a view to securing a substantial impact on the Global Goals for access to HIV/AIDS treatment, through consideration of among others affordability and IP issues.

The Executive Board requests the Secretariat to launch calls for proposals within this area of intervention and to present progress on implementation to the PSC.

The Board's endorsement of this area of intervention has no budgetary implications.
